Reyno de Polonia : dividido en sus estados y Palatinados: Por Don Tomas Lopez, Geografo de los Dominios de S.M. Madrid ano de 1786, C2, 45 x 52 cm

The map was published on a separate sheet and is unknown in the Lopez atlases.

The map is not described in Imago and other literature, but it can be concluded from the examples kept in the world's libraries that there were at least 2 states:

- 1) with the date 1786 marked in cartush (www.lpmaps.lt and Harvard Map Collection, G6520\_1786\_L6)
- 2) undated, probably 1809 (Biblioteca Nacional Madrid MR / 2/137)

A smaller 21 cm T.Lopez atlas is well known: *Atlas Elemental Moderno ó Colección de Mapas para Enseñar a los Niños Geografía con una idea de la Esfera*, Madrid, 1792

Included the map of Polish Lithuanian Commonwealth *Reynos de Polonia y Prusia*
